BADGE No. 2

THREE generations of Harrisons have been engaged in growing fruit trees, evergreens, shade trees, and shrubs at Berlin, Maryland, covering more than thirty-five years. At the beginning we had only a few acres; now we have a larger acreage in trees than any other firm in America.

FRUIT TREES

As the Largest Growers of Fruit Trees in America, we have recently seen fit to double our acreage, making entirely new plantings on the Sympuxent Bay, near Ocean City, and on land where fruit trees have never before been grown. This area lies along the Atlantic Ocean where the advantages of the salt air and morning dew, with plenty of moisture, develop strong, healthy trees, good foliage, good roots, and broad-topped growth.

APPLE TREES

Two-year Budded

Yellow Transparent	Winesap
Stayman	Paragon
York Imperial	Rome Beauty

One-year Budded and Grafts, all grades

Yellow Transparent	York Imperial
Williams' Early Red	Gano
Duchess	Yellow Newtown
Grimes'	Baldwin
Rome Beauty	Ben Davis
Jonathan	Livland Raspberry
Wealthy	Northern Spy
Delicious	Paragon
McIntosh	R. I. Greening
Stayman	N. W. Greening
Winesap	

CHERRY TREES

Sweet—Two-year

Black Tartarian	Napoleon
Bing	Schmidt
Governor Wood	Windsor
Lambert	Yellow Spanish

Sour—Two-year Budded

Dyehouse	Early Richmond
English Morello	May Duke
Montmorency	

PEACH TREES

One-year Budded—All grades

Carman	Greensboro
Hiley	J. H. Hale
Belle of Georgia	Heath
Elberta	Iron Mountain
Ray	Krummel's
Brackett	Late Crawford
Champion	Mamie Ross
Redbird Cling	Rochester
Ford's Late	Salway
Fox	Slappey
Francis	

PEAR TREES

Two-year Budded, $\frac{5}{8}$ - to $\frac{3}{4}$ - and $\frac{3}{4}$ -in.
cal. and up

Bartlett	Le Conte
Anjou	Seckel
Clapp's Favorite	Winter Nellis
Duchess	Kieffer

KIEFFER PEAR TREES—Extra size

1½ inches
1 to 1½ inches
 $\frac{3}{4}$ to 1 inch

PLUM TREES

One- and Two-year

Abundance	German Prune
Burbank	Lombard
Bradshaw	Imperial Gage
	Red June

GRAPE VINES

One- and Two-year

Concord	Moore's Early
Niagara

'Largest Growers of Fruit Trees in the

Now Is The Proper Time To Plant An Orchard WHY?

Because there are less Peach and Apple trees in the United States to-day than there were in 1910.

The following figures were copied from a bulletin issued by the Department of Commerce, Bureau of The Census, Washington, D. C. dated June 27, 1921.

APPLES:

Trees of bearing age—	
1920.....	115,265,029
1910.....	151,322,840
Decrease.....	36,057,811
Per cent of decrease.....	23.8
Trees not of bearing age—	
1920.....	36,171,604
1910.....	65,791,848
Decrease.....	29,620,244
Per cent of decrease.....	45.0

PEACHES:

Trees of bearing age—	
1920.....	65,654,921
1910.....	94,506,657
Decrease.....	28,851,736
Per cent of decrease.....	30.5
Trees not of bearing age—	
1920.....	21,623,657
1910.....	42,266,243
Decrease.....	20,642,586
Per cent of decrease.....	48.8

Another reason why every fruit grower should increase his planting is that our prices on peach and apple trees have been reduced more than 50 per cent.

On the other hand, prices of fruit this season are high--much above the prewar basis.
